 - None
 - Under discussion
 - SC69: Clarify router and firewall logging requirements
 - SC65: EVGs into RFC 3647 format v2
 - Under consideration
 - SCXX: SLO/Response for CRL & OCSP Responses
 - SCXX: Profiles clean-up
 - SCXX: Subscriber agreement and terms of use
 - SCXX: Measure all hours and days to the second
 - SCXX: Compromised/weak keys

Updates done since last F2F

- New TLS BRs versions:
 - 2.0.2: due to application of ballot SC66, which cleaned up some typos, misunderstandings, etc.
 - Upcoming a new version 2.0.3 due to the application of ballot SC70 to clarify the use of DTPs when performing Domain Control Validation. Under IPR review period
- Upcoming a new EVGs, version 1.8.1 due to the application of SC68, only affecting the organizationIdentifier field. This ballot is under IPR review period (ends on March 1st)
- New SCWG charter with some new conditions for those certificate consumer applicants and also adding a probationary period of 6 months for all new members as the main aspects/changes on the charter.
- Number of open issues in GitHub were reduced but new recent discussions have made them grow.
 - A new procedure to deal with this aspect to be discussed at the F2F

Validation SC summary

- MPIC
- Automation
- DTPs
